**Subject:** Fast Breaking News

To UOAA's ASG Contacts,

First I call your attention to the fact that WOC Nurse Week will begin tomorrow and continue through Saturday, April 21st. Now is the time to let your local media know exactly how important WOC Nurses are as part of the ostomy patient rehabilitation team and in ensuring the quality of life that we as ostomates can sustain. To acknowledge their importance in our lives the UOAA Management Board of Directors has prepared the attached Resolution that will be delivered to the WOCN Society Office on Monday. Use this document as you deem most appropriate.

Second, attached is a Conference Flyer that you can use to inform you members about what can be expected at our August Conference. It will make a good handout or as a page in your newsletter. A good tip to those thinking about attending the Conference .... to ensure that you have a room in the Marriott Lincolnshire Hotel, at the conference rate of \$ 109 , you should reserve your room as soon as possible ... the room block is smaller than in previous years. You can call **1-800-228-9290** for reservations and use **Group Code UOAUOAA** or go online at [www.lincolnshir Marriott.com](http://www.lincolnshir Marriott.com)

Third, an e-mail message that starts as follows:

Dear Sir,

We would like to famimiliarize our association, Young Ostomates Association of Nigeria with you.

This association was founded in July, 2006 under the supervision WAZOBIA Solidarity Movement, a non governmental association.

The association was formed to assist the young and old ostomates who needed help in the rural areas and the less privileged ostomates.

has been sent to many of UOAA's support groups and is thought to be spam. You are advised to ignore this letter and do not send any funds or even respond. This advice comes from the International Ostomy Association.

Best wishes for now,

Ken
