Eating with an Ostomy; Foods and Their Effects
Food Reference Chart for People with an Ostomy

Listed below are general guidelines for individuals who have a colostomy or ileostomy. It is important to know the effects that various foods will have on stool output. The effects may differ for each person depending on surgery type and length/ function of the remaining bowel. To determine individual tolerance to foods, try new foods in small quantities. Remember to always chew thoroughly.

- Water (stay hydrated)
- Warm beverages
- Warm soups
- Whole grains

---

*Odor from diet will differ for each person. If you have concerns, discuss with your doctor. Odor eliminators may be purchased from distributors of ostomy products. **People with an ileostomy are at greater risk for stoma blockage/obstruction. These food types should be eaten with caution and not introduced into the diet until 4-6 weeks after surgery. Introduce them slowly, one at a time, and chew well. ***Increasing the amount of fiber in your diet will help you avoid becoming constipated. Discuss options with your MD.*
